EduStat Software

General Information
Proposed Exercises

When the evaluation version of the EduStat is installed, databases and items banks are saved in the provided folders. It should be noted that the databases are prepared in French and in English; one database is multilingual (French and English). These files may be exploited to practice the use of this software. Here is the list of available databases:

Identification	Language	Exercise
EchantillonnageFR.edu	French	Sampling + Frequencies
ElevesFR.edu	French	Frequencies
EnseignantsMultilingue.edu	Multilanguage	Survey
EpreuveFR.edu	French	Metric Quality
MeanScoresEN.edu	English	Mean Scores
ResultatsMoyensFR.edu	French	Mean Scores
SampleEN.edu	English	Sampling + Frequencies
StudentsEN.edu	English	Frequencies
TeachersMultilanguage.edu	Multilanguage	Survey
TestEN.edu	English	Metric Quality

The following items banks are also available:

Identification	Language
BanqueItemsMaths_1.edu	French
BanqueItemsMaths_2.edu	French
BanqueItemsMaths_3.edu	French
BanqueItemsMaths_4.edu	French
BanqueItemsMaths_5.edu	French
ItemsBankMaths_6.edu	English

Six sets of exercises are available. Most of the statistical compilation options available in EduStat can be run. We have grouped these exercises under the following headings:

1. Frequency distributions
2. Metric qualities of a test
3. Treatment of mean scores results
4. Opinion analysis
5. Selection of samples
6. Preparation of tests with the use of items banks

Each set of exercises is described in a document that can be viewed or downloaded.
